

RETAIL PACKED PRODUCTS CATALOGUE

MOST FLEXIBLE SOLUTIONS

- **No price increase** reflect on raw material prices which increased too much in the last months! Great pre-season connections we made with reliable producers.
- **Advantageous retail packed product prices !** Attractive even for manufacturers – re-packers that supply bulk products and pack them themselves. No opportunity to supply bulk raw materials equivalent to our product quality, especially this season, and we recommend them to reduce their risks in this regard.
- **No limitation on the minimum order quantity** both under our brand and even with your company logo and name with our particular packages, with the aim of demonstrating our high product and packaging quality and being a regular and most attractive source of supply.
- **Opportunity to divide your needs** according to your sales volumes, procure newly manufactured products with a long shelf life from the first source without investing too much capital.
- **Claim that we will make the most flexible and most advantageous offer** if you provide your views and comments as a result of your evaluation and inform us by referencing the product codes of the products you are interested in in the leftmost columns (or describing your own)
